SCHOOL SOFTWARE LTD.

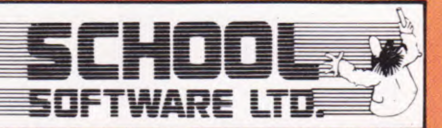

BETTER MATHS
(12 - 16)

Available for all IBM PC compatibles, Amstrad PCW, Atari ST & STE, Amiga, Amstrad CPC and Commodore 64.

This is a most wide ranging and comprehensive program at this level with plenty assignments for the keen and ambitious student.

While the program varies somewhat with machine type, all versions of it will satisfy the demands of the syllabus.

All the most popular sections of a maths course at this level are dealt with.

Full and extensive private tuition by computer, makes this excellent value for money. Particularly effective are the sections on linear and quadratic equations, with interactive graphics on the IBM PC version.

Excellent educational reviews. Designed by experienced teachers to promote better learning.

IBM PC version runs on Hercules, CGA, EGA or VGA graphic displays.
